Introduction

This document provides information about the hotfix #3 for Tidal Enterprise Orchestrator version 2.1.2.

Prerequisites

Components Used

The information in this document is based on the Tidal Enterprise Orchestrator version 2.1.2.

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

Issue

Powershell scripts timeout frequently or can be flanky in either remote or local environments.

TEO 2.1.2 HotFix 3

HotFix 3 can help with some of the issues around powershell scripting. Open a case and contact support in order to get access to this and any other Tidal Enterprise Orchestrator HotFix.
