

T.38 Fax solution for Cisco

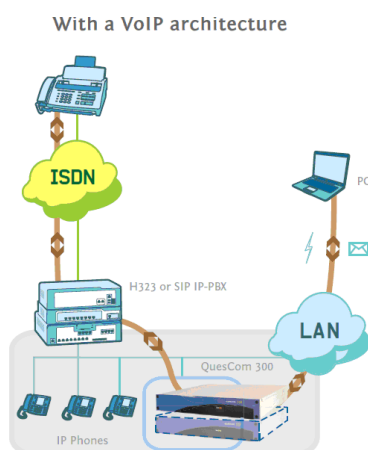

→ Receive Fax by email

Faxes can be received on:

- Single Number: Faxes and voice calls can be received on the same number AND at the same time.
- On dedicated fax DDI numbers

The email received by the user can afterwards be checked, saved, deleted, and transferred to any email address. A copy of the received fax can be stored on the administrator email.

Fax is send by e-mailed (SMTP) as an attachment with a TIF file to the recipient's address. The email address being associated to the phone number.

Release 5
Wizard based
configuration included

QuesCom 200

→ Send Fax

Fax sending may be submitted for password authorization according the sender's number.

Faxes can be sent using:

- Microsoft Outlook
- Microsoft Fax
- Lotus Notes
- A printer Driver

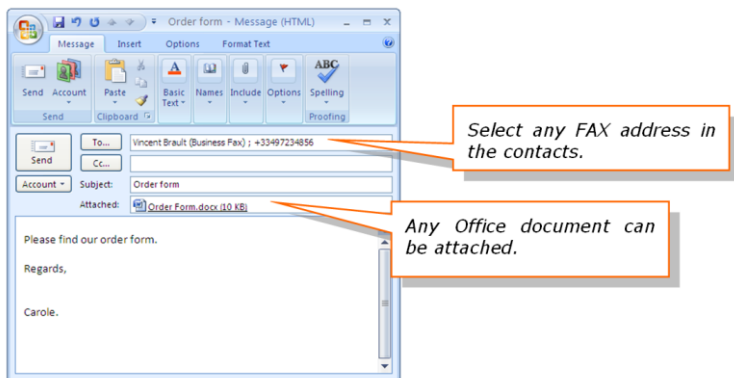

A copy of the sent fax can be:

- Sent by email to the sender
- Stored on the administrator email

The user can send a fax from Microsoft Outlook and attach any Microsoft Office documents and PDF files.

The user can send a fax from Microsoft Fax and Scan and benefit from all software features like:

- Select several fax recipients in personal & corporate address books
- Merge any Microsoft Office document as in a fax
- Schedule sending
