

Problems: menu are incomplete

Problem 1

When we try to enable the Remote Management:

The screenshot shows a web browser window displaying the Cisco Phone Adapter Configuration Utility. The browser's address bar shows the URL `192.168.15.1/Management.asp;session_id=ac`. The page title is "Phone Adapter Configuration Utility" and the user is logged in as "admin(Admin)".

The "Quick Setup" page is active, showing the following configuration options:

- Web Access:**
 - Admin Access: Enabled Disabled
 - Web Utility Access: HTTP HTTPS
- Remote Access:**
 - Remote Management: Enabled Disabled
 - Web Utility Access: HTTP HTTPS
 - Remote Upgrade: Enabled Disabled
 - Allowed Remote IP Address: Any IP Address
 - [0] [0] [0] [0] to [0]
 - Remote Management Port:

At the bottom of the configuration area, there are "Submit" and "Cancel" buttons. The footer of the page contains the copyright notice "© 2011 Cisco Systems, Inc. All Rights Reserved." and the identifier "SPA122".

The phone adapter said:

The Router is currently set to its default password. As a security measure, you must change the Admin's password (by visiting Administration -> User List) before the Remote Management feature can be enabled.

OK

Quick Setup

Web Access

Remote Management: Enabled Disabled

Web Utility Access: HTTP HTTPS

Remote Upgrade: Enabled Disabled

Allowed Remote IP Address: Any IP Address

0 . 0 . 0 . 0 to 0

Remote Management Port: 80

Submit Cancel

© 2011 Cisco Systems, Inc. All Rights Reserved. SPA122

So, I clicked to the administration tab:

Where is the User List?

The screenshot shows a web browser window displaying the Cisco Phone Adapter Configuration Utility. The browser's address bar shows the URL `192.168.15.1/Management.asp;session_id=ac1d4301e44dcc0e665`. The page title is "Phone Adapter Configuration Utility" and the user is logged in as "admin(Admin)".

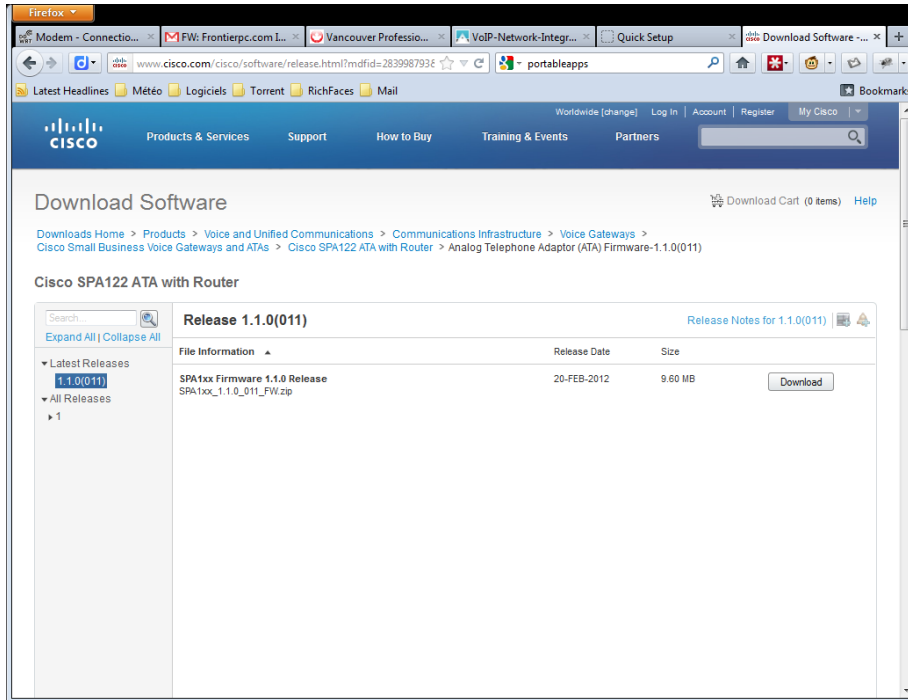

The navigation menu includes "Quick Setup", "Network Setup", "Voice", "Administration", and "Status". The "Administration" tab is selected. On the left sidebar, "Quick Setup" is highlighted.

The main content area is titled "Quick Setup" and contains the following configuration options:

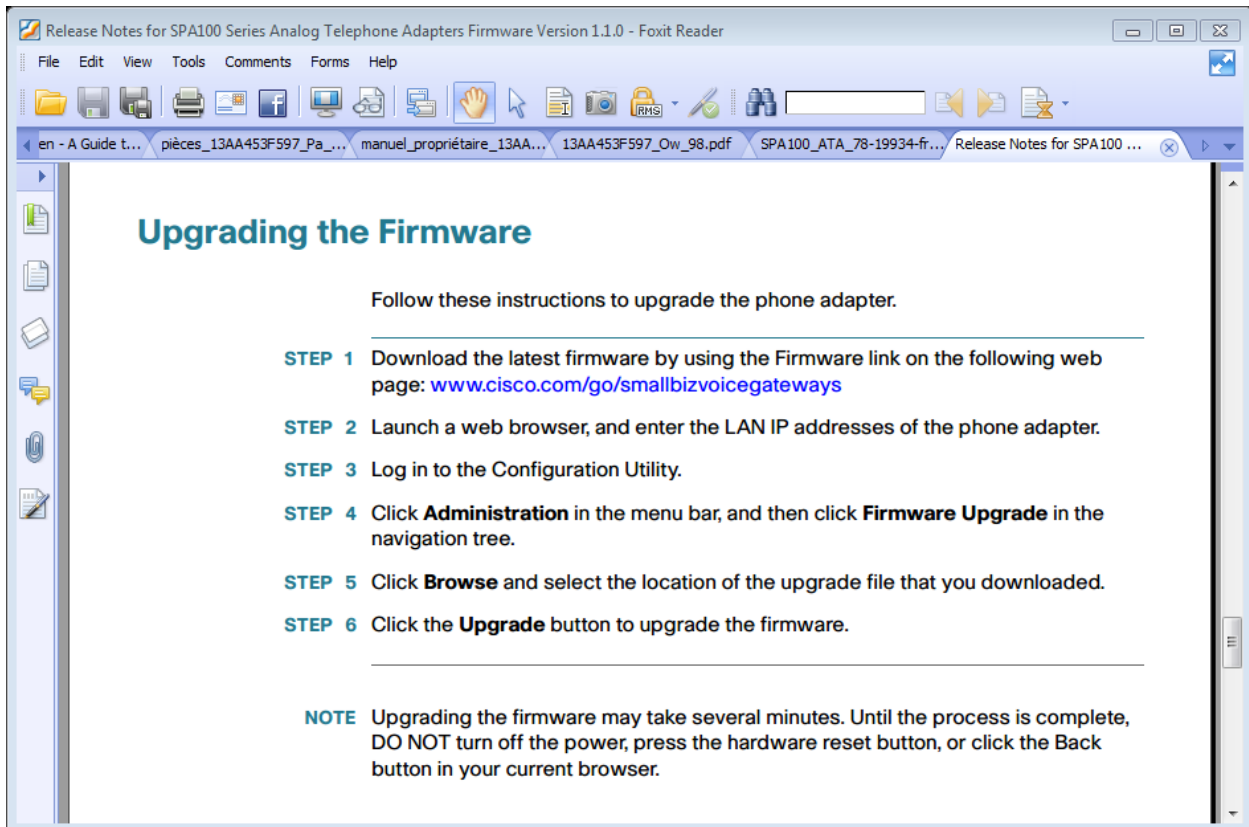

- Web Access**
 - Admin Access: Enabled Disabled
 - Web Utility Access: HTTP HTTPS
- Remote Access**
 - Remote Management: Enabled Disabled
 - Web Utility Access: HTTP HTTPS
 - Remote Upgrade: Enabled Disabled
 - Allowed Remote IP Address: Any IP Address
 [0] . [0] . [0] . [0] to [0]
 - Remote Management Port: [80]

At the bottom of the configuration area are "Submit" and "Cancel" buttons. The footer of the page contains the copyright notice "© 2011 Cisco Systems, Inc. All Rights Reserved." and the identifier "SPA122".

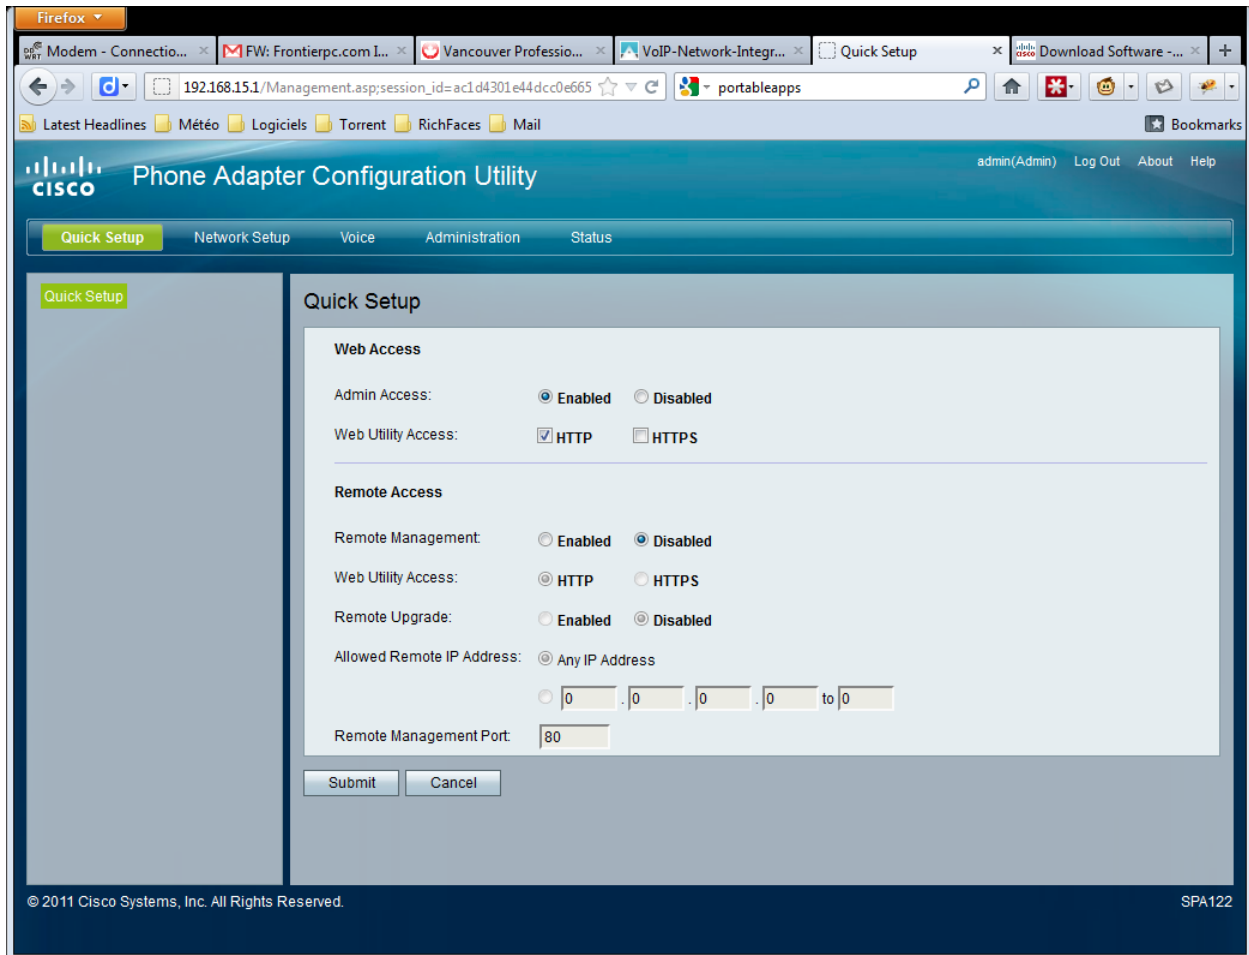

Problem 2: On the Cisco site for the SPA122

In the release notes:

So, in the administration Tab again, where is the “Firmware upgrade”?

Others problems:

We have others problems concerning the Network setup of the ATA with an existing router.

There are a lot of missing setup fields in the menus if I compare to the Acanac setting video.
