# How To Apply Patch on Appliance
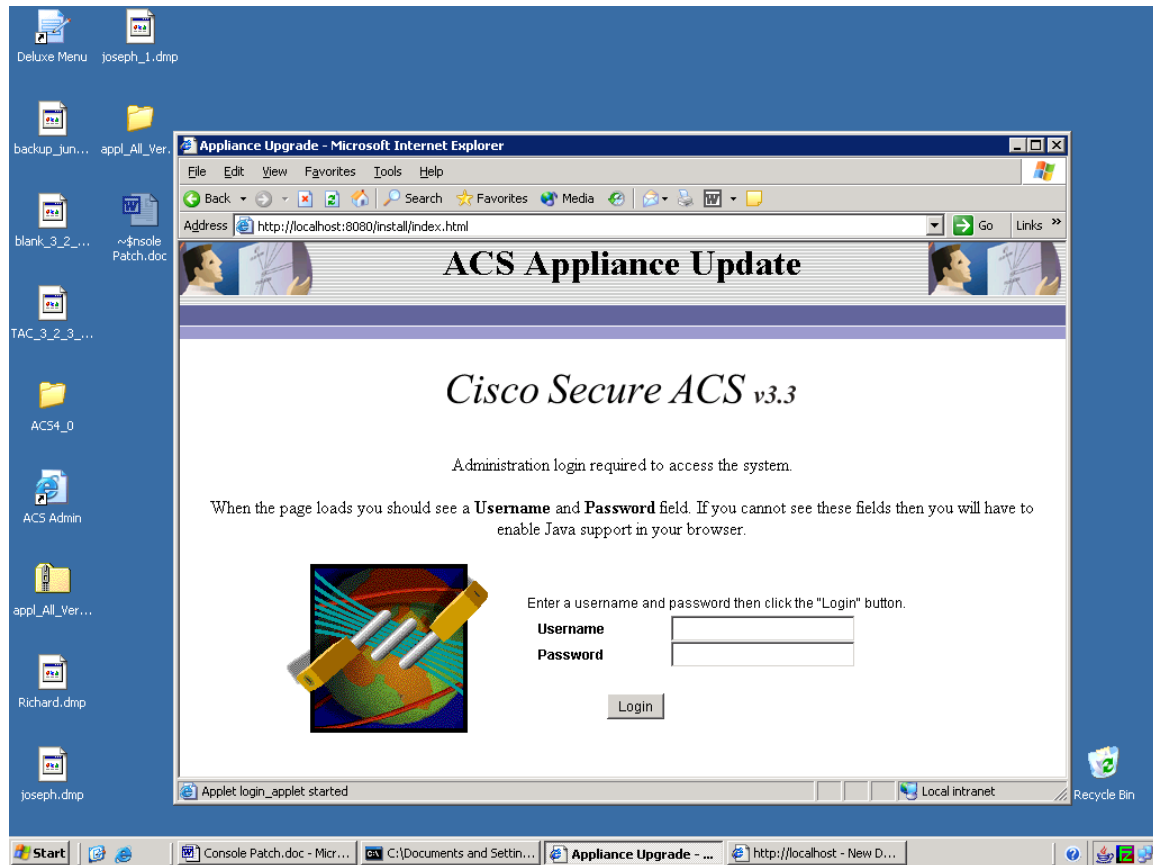

[1] Extract zipped file

[2] Look for 'autorun.exe' file and double click on it

[3] It will start a tomcat server on your desktop and you'll see a web page asking for ACS SE ip address :

Provide in the ACS SE ip address and press 'Install'

[4] It will prompt for ACS admin username and password as shown below :

Provide in the username and password and login.

[5] Then it bring up ACS GUI, then go to
System Configuration > Appliance Upgrade Status > Download,

Then we'll get a screen where it will ask for ip address of Install Server :

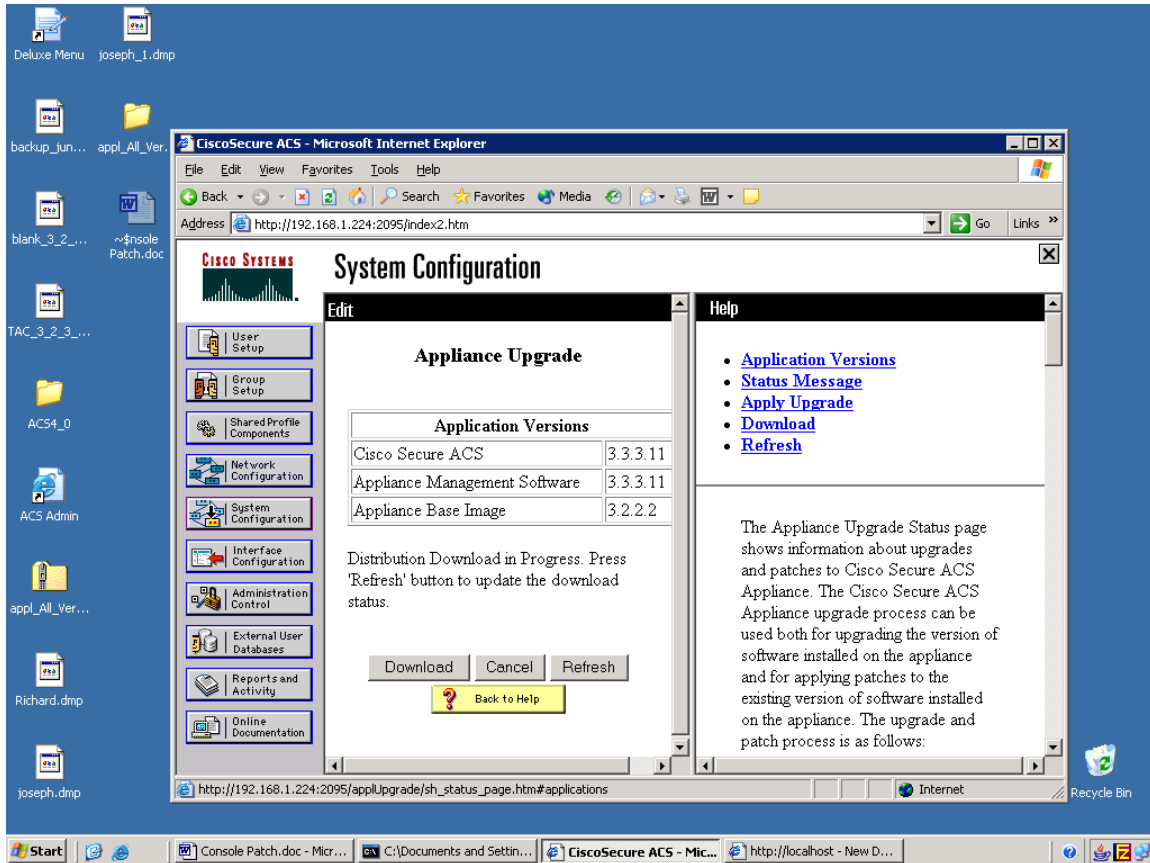

Provide in ip address of system from where we are applying this patch, in our case our desktop ip address, then click connect.
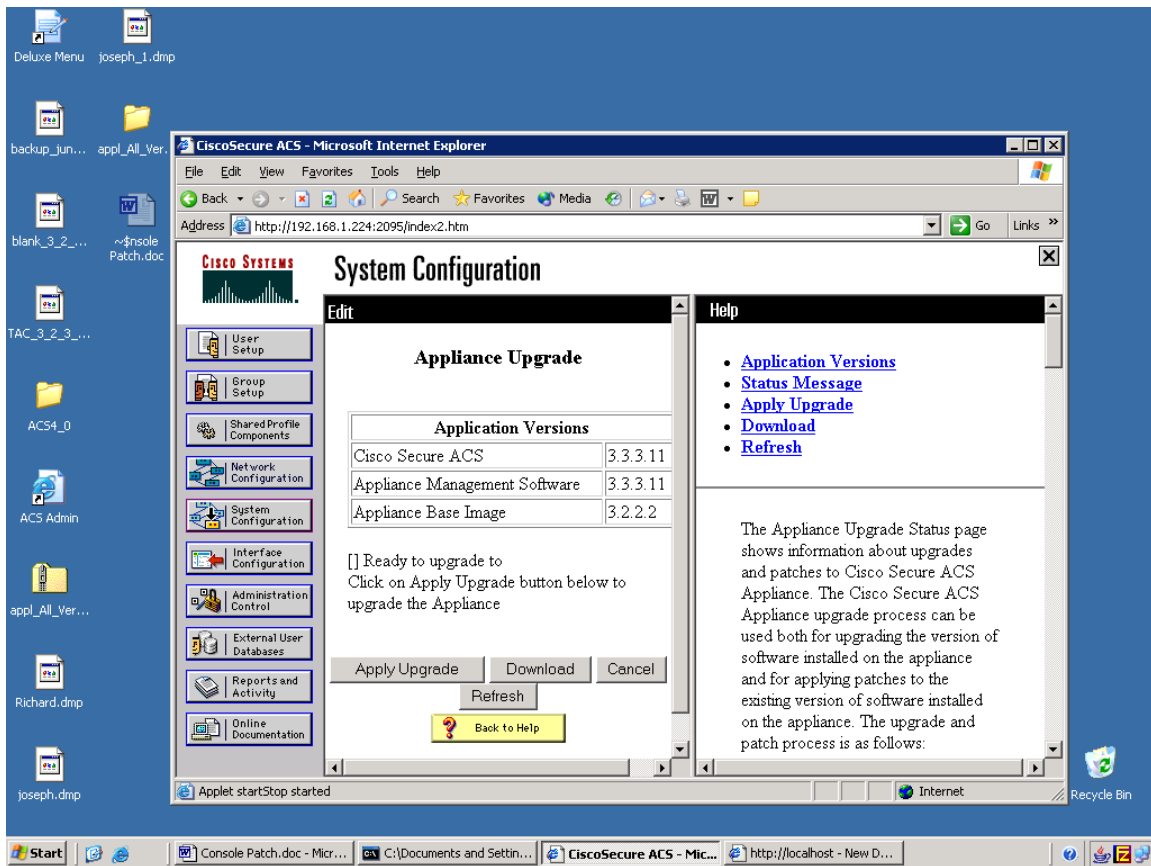

[6] It will show us following screen :

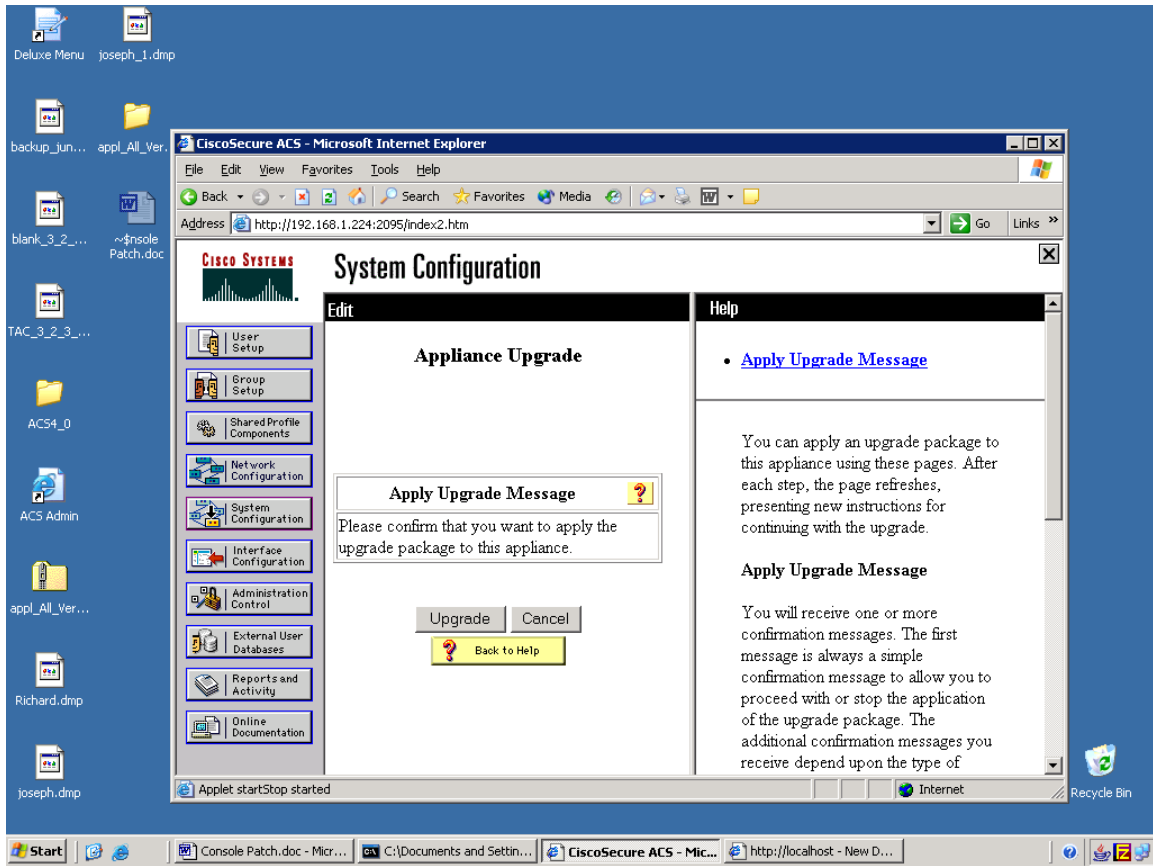

Click on 'Download Now'

Then it'll show us this screen :

Press 'Refresh' Till we see following screen :

[7] Now press 'Apply Upgrade'. Then it'll ask for confirmation :
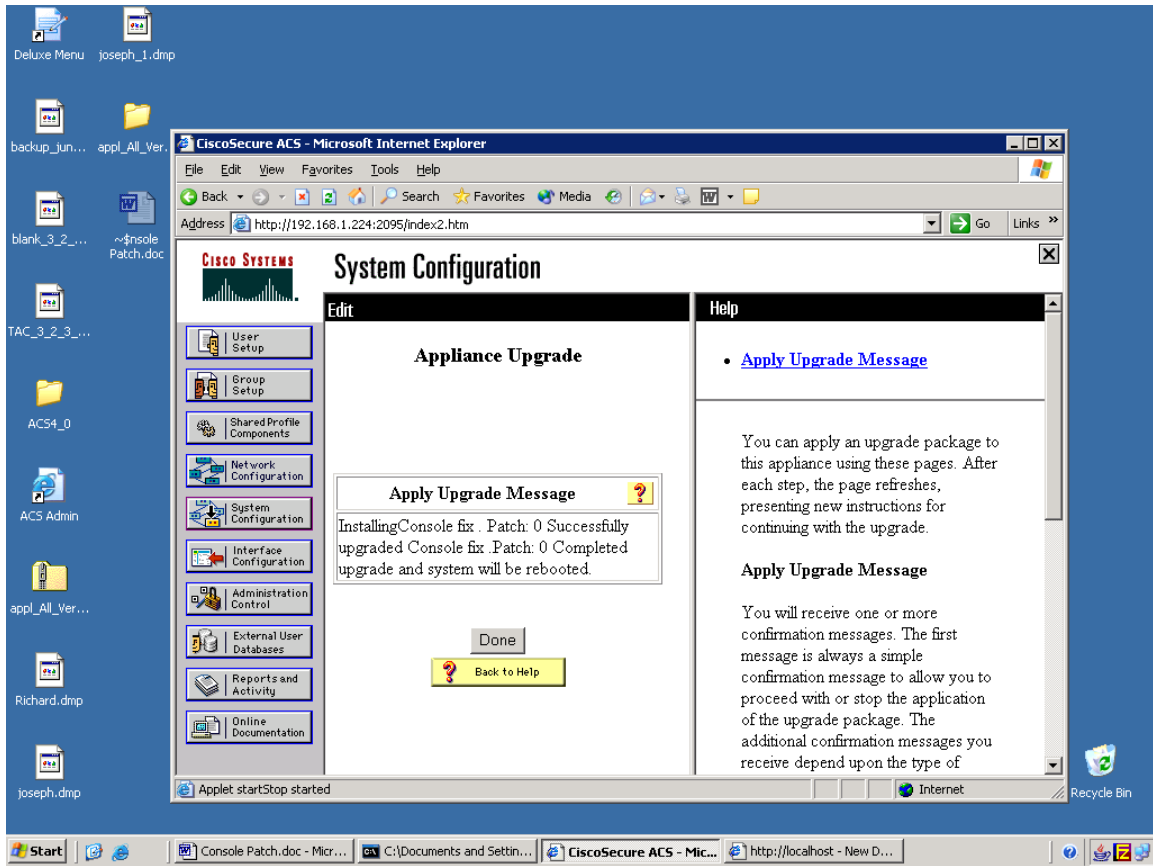

Press 'Upgrade', then we'll get information regarding the patch.

Click 'Yes'.

It'll take few minutes to apply that patch on appliance.

Then it'll show us a confirmation message :

Press 'Done', then system will reboot.

To confirm that patch has been applied successfully, goto

System Configuration > Appliance Upgrade Status

After everything is fine stop the tomcat server by clicking on 'stop distribution server' or if you want to apply this patch on some more appliance click on 'Install Next'
