

Configuring a Logo on Cisco SPA303 and SPA50x IP Phones

Check for updates of this document at: <u>https://supportforums.cisco.com/docs/DOC-13322</u>

A logo can be text or a BMP image.

The BMP image must be 128 x 48 pixels by 1 bit deep.

The phones display the logo during the boot sequence. This means that the logo is only visible during a very short period after the Cisco logo displays and before the "Initializing Network" message is displayed.

Configure the SPA303, SPA502G, SPA504G, SPA508G, and SPA509G phones with the web-UI as follows:

- 1. http://PhoneIP/admin/advanced > Phone tab >
- 2. Insert the path to the image in the BMP Picture Dow nload URL field. Example:

http://192.168.2.244/pictures/image04_128x48.bmp [can also use TFTP]

neral V BMP Pictur Sol	Station Name: bice Mail Number: e Download URL: Select Logo: tkey Labels Font:	StationName http://192.168.2 BMP Picture	2.244/pictures/image04_	_128x48.bmp	Station Die Select Backgro Screen Sa	aplay Name: Text Logo: und Picture: ver Enable:	StnDspNme

- 3. Change Select Logo to BMP Picture
- 4. Click Submit all Changes

The phone will reboot, retrieve the bmp file and display it when it next boots.

Configuration File:

If using a configuration file, the contents should be similar to the following:

<BMP_Picture_Download_URL ua="na">http://192.168.2.244/pictures/image04_128x48.bmp</BMP_Picture_Download_URL>
<Select Logo ua="na">BMP Picture</Select Logo>

Troubleshooting:

Logo does not display.

Verify that you are using a 1-bit deep BMP image that is 128x48 pixels in size. A sample image is provided with this document.
